

❑ ACTIVITY 9 – Task list

– Create a Web application that looks like the following picture:

– The "+" button adds tasks, but only if there is content in the box.

– Each button with the text "remove", removes the corresponding task. As soon as you add a task, this button will appear next to it so that you can perform this action.

– When you click on a task (in the name of it), it is removed from where it is, and becomes the first in the list.

– The only font used is Montserrat (Google Font) in thicknesses 400 and 700.

– Colors: teal, brown and red

❑ ACTIVITY 10 - Calculator

– Create a web app with the following appearance or so:

- It is a calculator that must work perfectly with the buttons that appear
- The letter of the numeric boxes is from Google Fonts and is called Audiowide
- The frame must be fully centered on the screen regardless of the resolution
- Use the colors you want (a specific one for when the mouse hovers over a calculation button)
