

❑ **ACTIVITY 9 – Task list**

- Create a Web application that looks like the following picture:

- The "+" button adds tasks, but only if there is content in the box.
- Each button with the text "remove", removes the corresponding task. As soon as you add a task, this button will appear next to it so that you can perform this action.
- When you click on a task (in the name of it), it is removed from where it is, and becomes the first in the list.
- The only font used is Montserrat (Google Font) in thicknesses 400 and 700.
- Colors: teal, brown and red

❑ **ACTIVITY 10 - Calculator**

- Create a web app with the following appearance or so:

- It is a calculator that must work perfectly with the buttons that appear
- The letter of the numeric boxes is from Google Fonts and is called Audiowide
- The frame must be fully centered on the screen regardless of the resolution
- Use the colors you want (a specific one for when the mouse hovers over a calculation button)
