

ACTIVITY 9 – Task list

Create a Web application that looks like the following picture:

The "+" button adds tasks, but only if there is content in the box.

Each button with the text "remove", removes the corresponding task. As soon as you add a task, this button will appear next to it so that you can perform this action.

When you click on a task (in the name of it), it is removed from where it is, and becomes the first in the list.

The only font used is Montserrat (Google Font) in thicknesses 400 and 700.

Colors: teal, brown and red

ACTIVITY 10 - Calculator

Create a web app with the following appearance or so:

It is a calculator that must work perfectly with the buttons that appear

The letter of the numeric boxes is from Google Fonts and is called Audiowide

The frame must be fully centered on the screen regardless of the resolution

Use the colors you want (a specific one for when the mouse hovers over a calculation button)
